

# BRIDGE RENOVATION SERVICES

Does your bridge really have to be replaced? Consider a detailed condition survey and analysis, and reconstruction by structural engineers, civil engineers, and contractors experienced in this special field.

*Third Street Bridge in Cannon Falls, Minnesota, a 94 year old bridge. Rehabilitation cost about 33% of replacement, in half the time of new construction - with a new functional life predicted in excess of 20 years!*

*Removal of the old concrete deck with bituminous overlay exposes the steel members for repair before placement of a new wooden traffic deck, and adjacent sidewalk deck.*

*The classic look of a real bridge!*
