

CONSTRUCTION TESTING/INSPECTION SERVICES

We offer a wide range of material testing and inspections for new construction, as well as for evaluation of existing building materials and foundations. Our testing operations are directed and supervised by Licensed Professional Engineers to comply with ASTM Standards. Our ICBO, ACI, AWS, and State-DOT certified Technicians and Inspectors can provide our clients with PDF e-mail reports of the following services:

- *Field/Laboratory Testing of Soil/Aggregate Fill*
- *Soil Bearing Capacity Testing for Foundations*
- *Field/Laboratory Testing of Concrete/Grout/Mortar, Concrete Masonry Units, Face Brick, and Block Prisms*
- *Field/Laboratory Testing of Bituminous and Concrete Pavement*
- *Field/Laboratory Testing of Roofing*
- *Coring and Evaluation of Concrete or Bituminous Pavements*
- *UBC “Special Inspections” of:*
 - *Reinforced Concrete and Masonry*
 - *Structural Steel Welded and Bolted Connections (field and shop)*
 - *Post-tensioned Concrete*
 - *Spray-Applied Fireproofing*
- *Air/water Infiltration Testing of Windows and Doors*
- *Floor Flatness Testing of Slabs (F numbers)*
- *Inspection of Piles, Caissons, and Geopiers™*
- *Vibration Monitoring*
- *Full-scale Load Testing*
- *Pull-out Tests*
