

# FIBER OPTIC SERVICES

GME was founded in 1981 to provide engineering, consulting, and testing services to architects, engineers, developers, government agencies, owners, and contractors. By combining the expertise of our Special Projects (Forensic Testing) group and our Environmental group, we provide our clients with unique services in exploring for mold and moisture in inaccessible portions of buildings. We can also install remote sensors in walls to measure moisture content, particle matter, temperature, and radon. We work with analytical laboratories for fast turn-around on mold tests. The photographs below illustrate the use of fiberoptic scopes to view the interior of walls. Please contact us to discuss any of your projects where this type of study is required.

## Special Testing Services Contacts

Bill Bloemendal, P.E.  
GME Consultants, Inc.  
Minneapolis, Minnesota  
800-795-8523

Greg Prom, Env. Scientist  
GME Consultants, Inc.  
Duluth, Minnesota  
800-967-2053

Scott R. Bierbaum, E.I.T.  
GME Consultants, Inc.  
Chicago, Illinois  
800-517-5200
