

WETLAND SERVICES

Wetlands add beauty and value to the landscape, providing visual enhancements and practical solutions to problem areas. Wetlands are increasingly incorporated into site development plans. The public view of wetlands has changed: wetlands are now considered to be valuable resources which serve to limit storm-water runoff, improve water quality, and provide wildlife habitat. GME has been providing wetland services for over 10 years.

Professional Services

- Wetland Delineations
- Wetland Classifications
- Permitting
- Mitigation Plans

Professional Team

- Environmental Scientists
- Plant Biologists
- Soil Scientists
- Hydrologists
